ADVANCED TREATMENTS

Autologous Fat Transfer

Considered by some as the 'ideal filler'. Your own fat is used to restore lost volume in the face. Useful when several units of filler would be required to restore volume.

Price on consultation

'No Knife Facelift'

FaceTite®/NeckTite®

Radiofrequency skin tightening used under the skin on the Jowls, lower face and neck, usually combined with a little liposuction for optimal results. This can be combined with fat transfer to restore lost volume elsewhere on the face and is an excellent, minimally invasive alternative to a surgical facelift.

Price on consultation
